

River Deep is a newly established collaboration of 6 like-minded organizations working exclusively to serve individuals with disabilities, many of whom served or are serving in the military. Their common goal is to acclimate, enable and engage their clients as a way to assist in the healing process, improving outlook and quality of life.

SCI HOP is a program within this collaboration that organizes group outings for clients across all the organizations to help toward this goal.

Anglers of Honor Program - Fly Fishing with Operation TBI Freedom, Craig Hospital and Freedom Hunters

It's a beautiful day in the Colorado Mountains, we have a big group of Vets and Craig Hospital patients ready for some fly fishing instruction. Before we hit the river and ponds we break up into small groups with the guides from Anglers of Honor to learn knots, gear and casting. There, we suit up with waders and fly rods and are assigned our guides. Some head to the river and some to the ponds. We have track chairs for those who want to go off road or through the stream. Both large and small trout are caught be we are wanting some for everyone. It's lunchtime and we head up to the clubhouse and a special lunch prepared by the Escoffier Culinary Academy from Boulder who always do a great job. Great food, guides, weather, fishing, smiles all around and, of course, fish stories. It's been a great day and a big thanks to everyone who made this possible.
